

MSC Test Problem

Problem type : **Sujiken Sudoku**

Rules: Sujiken (from Japanese "sujikai", literally "diagonal") is a variation of Sudoku, invented by George Heineman (USA). The puzzle consists of a triangular grid of cells containing digits from 1 to 9. The objective is to fill a grid with digits so that each cell contains a digit and no digit is repeated in any column, row and diagonal in any direction. Also, no digit occurs twice in any of the three larger 3×3 square regions and any of the three larger triangular regions enclosed by thick borders

1. **Note the answer key, all digits in highlighted cell without space, left to right.**
2. **Submit the answer key at Form.**
